

## **ERAMSUS+ PROJECT PROGRAMME**

### **CREATIVE EUROPEAN SCHOOL**

#### **C.L.I.C.K.**

#### **CASTELBUONO MEETING**

**23rd - 29th OCTOBER 2016**

On 23rd October there was, at F. Minà Palumbo School in Castelbuono, an international meeting of our Erasmus+ Project: Creative European School C.L.I.C.K. Six countries have taken part to this event: Lithuania, Spain, Greece, Portugal, Romania and Italy.

Our school gave us the opportunity to participate to this fantastic experience. We were very excited to host other people that live in different places in Europe.

The students and the teachers arrived in Castelbuono in the late evening, and we looked forward to host them, in fact we were so happy, especially for the first night.

During the 5 days of the meeting, we have done a lot of interesting activities, like our Sicilian laboratories. We have made a Sicilian sweets laboratory of "Frutta Martorana" (typical Sicilian sweets), and it was so funny, because then we ate them.

Besides, we have made a Musical instruments game with the music teachers. Me and the other students of my school played some songs with the recorder, while the other guys played different instruments between them. It has been a fantastic laboratory.

Another day we created the "Carti Rizzi", another laboratory in which we have made a poster with the Carti Rizzi, a typical Sicilian activity of Castelbuono and we took some photo of them.

In the days following we visited the most important monuments of Castelbuono, like the Castle of Ventimiglia; a medieval castle which represents the symbol of the Town, the Clock tower and the Mother church of Castelbuono.

During this fantastic week, we visited different places in Sicily. The first one was Aidone. There we visited the Greek Sicilian town of Morgantina, called

the “Sicilian Pompei”, and there we made a project activity that’s a practical demonstration how to create a mosaic . It was very funny and interesting. Besides, in the Country, we visided the archaeological Museum of Morgantina, and then , we did a multimedia tour at the Geo Park and in the Roman “Villa Del Casale”. After that, we visited the historical town center of Piazza Armerina.

Another town we visited was Isnello . There we followed an Astronomy lesson about our solar system in the Astromic Observatory and Planetary , called “Gal Hassin”. After that we visited the town center of Cefalù and the Cathedral . Everything was very interesting .

The last night, in our school, there was a Dance show and the farewell dinner with typical Sicilian food cooked by the students’ parents. That was the most exciting night of all. It was at the same time a moment of joy and sadness, because it was the time where we saygoodbye.

I’ll never forget this amazing experience, which gave me the opportunity to meet fantastic guys.
